Antwort

In den bisherigen Versionen von Faxware/David gab es die Möglichkeit, Faxe gebührenoptimiert zu versenden. Dieses ist ab Version David XL nicht mehr möglich. Grund hierfür sind die vielen unterschiedlichen Provider mit deren zahlreichen Tarifoptionen, welche eine sinnvolle Gebührenberechnung unmöglich machen. Sie können, um Faxe zu bestimmten Zeiten versenden zu können, mit dem DvISE Befehl »VERSANDTERMIN« arbeiten. Informationen zu diesem Befehl finden Sie in der Online Hilfe.
