Antwort

Ab einer Installation des SP1b für David 6.5 können Sie Logos versenden, derzeit allerdings nur mit Nokia Handys und nicht netzübergreifend (also nur D1 zu D1, D2 zu D2 usw.)

Die Betreiberlogos werden als SMS mit Dateianhang aus dem Tobit InfoCenter versendet. Dieser Dateianhang besteht aus einer 72 * 14 Pixel grossen BMP-Datei mit einer Farbtiefe von 1Bit (s/w).

Über ein Webformular kann z.B. die Steuerdatei wie folgt aufgebaut sein:

```

@@dataformat SMS
@@number # #nummer# #
@@betreff # #DEFAULTLOGO
@@owner ID-Nummer
(Optional, wenn z.B. ein bestimmter Benutzer diese Daten versenden soll)
@@attach \\servername\vol1\david\archive\logos\d1.bmp
(Pfad zur BMP-Datei)

@@sofort@@

```
